BEVERLY HOT, BUT TAFT DOESN'T MIND.
[Associated Press Night Report.]

LOS ANGELES DAY AT FAIR.
SHATTLE (Wash.) Aug. 8.—A delegation of 100 business men of Los Angeles representing the Chamber of Commerce of that city arrived here tonight on their special train, ready to participate in the celebration of Los Angeles Day at the Alaska-Yukon-Pacific Exposition tomorrow.

R. H. THOMAS.
PARKERSBURG (W. Va.) Aug. 8.—Former Mayor R. H. Thomas fell dead tonight while sitting on the front porch of his home. Heart disease, superinduced by extreme heat, is ascribed as the cause of his death.

Thomas E. Heaney, alias Lieut. Harry King, to be tried here for impersonating a United States officer. Secret service agents are on the trail of "Lieut. McFarland," apparently a double of the man under arrest.

HEANEY'S "DOUBLE."
Bad Checks Are Laid to Him.
Chief Hazen Believes That Swindles Were by Two Men.
Some Frauds Apparently by Another Bogus Army Officer.
Young Woman Writes to Prisoner That She Will Stand By.

HAT Thomas Edwin Heaney, alias Lieut. Harry King, alias Maj. George S. Anderson, who is now under arrest in San Francisco upon a charge of impersonating a United States officer, is not solely responsible for fictitious checks which have been passed in Los Angeles and other Coast cities, is the conviction of George W. Hazen, chief of the United States Secret Service in California, Nevada and the Southwest Territories. The officer believes that Heaney has a "double" in the person of Donald C. Hoffman, who went under the name of Lieut. Elmer McFarland.

Hoffman looks very much like Heaney, and his method of operation is identical with that of his alleged brother swindler. Both men have passed numerous checks, all drawn for small amounts; both have posed for their pictures in local photograph galleries, and both use a wide swath in society circles. While Heaney appears to be the champion heart-breaker, Hoffman is also believed to be an adept in the way to win a woman's affections by a lavish display of a glittering uniform and bogus insignia of rank.

STRIKING LIKENESS.
Until Hazen began his investigation, it was supposed that there was only one bogus army officer who had been under arrest, since then it has been positively established that Hoffman and Heaney are separate individuals, although they are working the same game. It is even possible that they are brothers or are closely related, for the photograph of Heaney is a striking likeness of Hoffman.

Through the man now under arrest, the officers expect to get a line on "Lieut. McFarland," who was in this city only a few days ago. If Heaney denies all knowledge of his double, the officers will work on another lead. Within a few days they expect to get Hoffman, although the Secret Service agents will not disclose the nature of their information.

The fact that two men were traveling from city to city, passing fictitious checks and impersonating army officers, made the work of fixing the responsibility for the fictitious checks a difficult one.

Both men carried forged credentials and fictitious recommendations and they registered at first-class hotels in Los Angeles, San Francisco and other cities along the coast. Hoffman is believed to be the man who passed bogus checks upon several local merchants in June, while Heaney is supposed to be the fellow who victimized a Los Angeles man.

If the gay young "Lieut. McFarland" (Continued on Second Page.)

BAD COUNTRY FOR BLONDES.
New York Physician Says They Are Driven to Jails and Asylums.
[BY DIRECT WIRE TO THE TIMES.]
NEW YORK, Aug. 8.—[Exclusive Dispatch.] A startling note of warning to blue-eyed, light-complexioned New Yorkers is uttered by Dr. Charles E. Woodruff, surgeon and major in the United States Army, who has just completed a private tour of the prisons and asylums of the city and State. The jails and institutions, he says, are full of blondes, who, unable to stand the struggle for existence in a climate to which they are unaccustomed, have fallen into poverty, disease and crime.

"What is true of New York," he says, "is true of the country as a whole, and unless the blonde Americans find or adopt some better means of survival than they have at present, they will be wiped out as a type in favor of the brunettes."

The great trouble is sunshine. There is too much of it in America for the blondes, says Dr. Woodruff. It breaks down their nervous systems, renders them unstable, morally as well as physically, and makes them peculiarly liable to the ravages of consumption and other deadly ailments.

AIMING HIGH.
"JANE ADDAMS FOR PRESIDENT."
BOSTON'S SUFFRAGETTES PLAN NOVEL CAMPAIGN.

"No Better National Housekeeper Than Little Women Who Have Done So Much for Chicago," Declares Miss Alice Stone Blackwell—Star Opinion Thursday Morning.

[BY DIRECT WIRE TO THE TIMES.]
BOSTON, Aug. 8.—[Exclusive Dispatch.] "Jane Addams of Chicago, future President of the United States will be the slogan before many months have passed, according to the advocates of equal suffrage."

Boston has been chosen as the starting point of the startling and novel campaign by which the women hope to gain prestige, if not actually a President.

When William Dean Howells confessed in his characteristic fashion that he "had no doubt whatever that our national housekeeping could be in no better hands than those of our natural housekeepers," he little thought that the suffragettes were planning to elevate a woman to the highest office in the nation.

Miss Alice Stone Blackwell says that no better national housekeeper will be found than Jane Addams of Chicago, and her opinion is shared by Boston suffragettes who are preparing to work with her and main for the election of Miss Addams.

"A woman President would be quite as competent to attend to the national duties as a man," said Miss Blackwell. "There have been women rulers of countries before now and many of them stand out in history as notable for their good judgment and strong, intelligent minds."

EUROPE IS TROUBLED.
Crisis in Crete Is Alarming.
Dispute Between Turkey and Greece Reaches the Acute Stage.
Porte Has Not, However, Sent Ultimatum to King at Athens.
Four Protecting Powers Are Ready to Prevent an Open Break.

[ASSOCIATED PRESS NIGHT REPORT.]
LONDON, Aug. 8.—The acute stage reached in the dispute between Turkey and Greece over Crete, is causing anxiety in the European capitals such as always accompanies any diplomatic difficulty in that quarter. However, as M. Iswolsky, the Russian Foreign Minister, said at Cannes last Tuesday, if there were any awkward developments in the situation, Europe would see that no mischievous effects resulted.

From the latest dispatches it appears that Turkey has not presented anything in the form of an ultimatum to Greece, but has confined herself to verbal protests, while the four protecting powers are making representations both to Constantinople and Athens, to secure an amicable settlement of the dispute.

The four powers insist that under no circumstances shall the Greek flag be hoisted over any public building in Crete, and the foreign Consuls at Cannes have been instructed to impress this upon the Cretan authorities.

George W. Jackson, who bid fine show horse away from Reginald Vanderbilt only to find that it walked like a kangaroo, has dealer arrested.

"DONE FIRST."
KICKS COMING ON "HOSS" TRADE.
GEORGE W. JACKSON COMPLAINS OF HIS "BARGAIN."

Outbid Reginald Vanderbilt for Animal, Only to Find, So He Says, That the Costly Beast Would Look Well in a Milk Wagon, But Does Not Suit Him.

[BY DIRECT WIRE TO THE TIMES.]
CHICAGO, Aug. 8.—[Exclusive Dispatch.] "Do unto your neighbor as he would do you, but do it first." The foregoing sentiment as a guide for horse traders from a novel that was popular a few years ago has been running through the mind of George W. Jackson, for several weeks.

About the middle of June Mr. Jackson bought a horse which he intended to enter at the Lake Forest horse show. Reginald Vanderbilt of New York was anxious to purchase the same animal, but Mr. Jackson executed a coup by offering D. W. Hogan, owner of the horse, \$150 more than Vanderbilt bid.

Mr. Jackson counted out \$150 into Mr. Hogan's hand, and the latter, slapping the money down, remarked, "The horse is yours." Mr. Jackson says he was "stung" in the deal.

Instead of being a "show" horse, sound in limb and body and without a blemish, the animal, Mr. Jackson says, would not look well hitched to a milk wagon. In some respects the horse is "classy," but Mr. Jackson asserted that it has a stringhalt.

He went to Hogan, the former owner of the animal, and demanded the return of his \$150, but Hogan, who has ideas somewhat like David Harum, refused to "trade back." Mr. Jackson caused his animal on a charge of obtaining money by false pretenses.

Armed with the warrant, Detective Dubach of the Central Station went out to the peaceful town of Byron, Ill., Saturday night and brought Hogan to Chicago. On their arrival at the Harrison-street Police Station early this morning, Hogan sent for A. B. Perigo, an undertaker, who signed a \$2500 bond for appearance in court this morning.

"That was as fine a horse as ever a man drew rein over when I sold it to Mr. Jackson," said the Byron horse broker. "Vanderbilt wanted to give me \$1400, but I said no. He's worth \$1200 if he's worth a cent. Mr. Jackson heard about the horse and came down to see it. Later he sent two or three experts out to my place and on their advice I understand the horse was bought."

WING AS PACIFIER.
Stockholm Situation More Serious.
Gustav Intervenes in Attempt to Secure Compromise.
Tie-up Almost Complete With Printers and Drivers Now Idle.
Telephone and Telegraph Employees to Go Out on Wednesday.

[ASSOCIATED PRESS NIGHT REPORT.]
STOCKHOLM, Aug. 8.—The tide of the business of the country, a result of the strike is so serious that King Gustav intervened in endeavor to secure a compromise. The King today sent a message to the parties to the conflict exhorting them to agree at the earliest possible moment and advising arbitration.

It was after King Gustav's message had been read and approved a Cabinet meeting that he summoned to the palace the two leaders of warring factions, Director Von Ström of the employers and Senator Erik Gustafsson, president of the Federation of Trades Unions, for a conference.

The result of this conference has yet transpired but apparently King's efforts for a peaceful settlement of the trouble went for naught tonight. It was announced that the printers would strike tomorrow, the National Labor Union has a proclamation that, beginning tomorrow morning, every day whose day is not wearing a union badge will be stopped by strikers. No compromise was stated, will be made for driving their own program.

The union further threatens to take the attempt of the Stockholm Street Car Company to place the cars on the important lines.

More than 1000 telephone and graph employees will strike Wednesday.

The Employers' Association is paying out \$100,000 daily to support weaker members.

The cash in the association's treasury is sufficient to keep up the strike for three weeks and when funds in the treasury are exhausted the association has a reserve of \$450,000 which may be used. Strikers daily are receiving large contributions from Denmark, Norway, Finland, Germany, Rumania, Bulgaria.

A prominent journalist, Gustaf has been summoned to court by public prosecutor, charged with crime against the penal code, the exhorting the employees of the railway to strike.

TURKEY DISPLEASED WITH GREECE'S REPLY.
[ASSOCIATED PRESS NIGHT REPORT.]
CONSTANTINOPLE, Aug. 8.—The Porte has taken at Athens concerning Crete have been confined exclusively to verbal representations. No written note has been presented and the representations have been couched in the friendliest language consistent with firmness.

Greece had already informed the Porte that the Greek officers in Crete have been struck off the Greek army list since 1904, and that the whole question was in the hand of the four protecting powers.

Greece said also that she expected to make a formal reply reiterating assurances of Greek neutrality.

From the Turkish standpoint such a reply will be unsatisfactory, but much is hoped for from the energy the protecting powers are displaying in the present crisis becoming dangerous.

The ambassadors of the four powers, Great Britain, Russia, France and Italy, conferred today and will meet again tomorrow to agree upon a common reply which will be taken without delay.

The agitation against Greece is growing in the Turkish provinces. In some towns it has taken the form of a boycott of Greek goods. A volunteer force of 1000 men has been formed at Monastir ready to march against Greece.

PAYNES GOES IN FOR GOLF.
Author of Tariff Act Turns to Cabinet Game to Reduce His Avoirdupois.

[ASSOCIATED PRESS NIGHT REPORT.]
WASHINGTON, Aug. 8.—[Exclusive Dispatch.] Seneca Elisha Payne, the author of the tariff law and one of the fattest members of Congress, has been seen today that he is losing his figure. This fact has been apparent to his friends for some years.

The round figure of the Republican floor leader has been a subject of much mirthful comment from time to time and Mr. Payne's "waddle" has become a byword in Washington. This will all be changed in the near future for the famous successor to Nelson Dingledy is about to begin a serious course in golf.

Before leaving for Nantucket he purchased a set of clubs and although at present he does not know a "driver" from a "club," he intends to trim several aspirants to the golf cabinet when he returns to Washington.

WATER DRIVES HIM MAD.
Sight of Tumbler Fall in Salmon Vortex Case of Hydrophobia Victim Soon Dies.

[BY DIRECT WIRE TO THE TIMES.]
NEW ORLEANS (La.) Aug. 8.—[Exclusive Dispatch.] John Higgins, Englishman, who was bitten on the head by a mad dog four weeks ago and from the Pasteur Institute before long developed hydrophobia, a violent form today, on seeing a tub of water in a saloon.

Higgins rolled to the floor and to bark like a dog. Half a dozen were required to subdue him, soon followed.

The dog which inflicted the fatal bite was killed soon after.

BATTLESHIPS ARRIVE TO KEEP PEACE.
[ASSOCIATED PRESS NIGHT REPORT.]
ATHENS (Greece) Aug. 8.—It is stated that the Greek reply to Turkey will be delivered Tuesday. The representatives of the powers are holding frequent conferences with the Premier and Foreign Minister.

An Austrian squadron and an Italian warship have arrived at Volos. It is supposed they are on the way to Salonika.

SETTLEMENT IN SIGHT.
CAR STRIKE MAY DIE FROM LACK OF CAUSE.
[ASSOCIATED PRESS NIGHT REPORT.]
CHICAGO, Aug. 8.—According to the outlook tonight, there will be no strike of the street-car employees of Chicago, and an amicable settlement is likely to be reached by tomorrow night.

It is said, an offer of a wage increase based on the employee's length of time in the service will be made by President Milton of the Chicago City Railway Company.

John M. Roach, president of the Chicago Railway Company, has had his

INFLUENCE REGAINED BY BRITISH CAPITAL.
[ASSOCIATED PRESS NIGHT REPORT.]
LONDON, Aug. 8.—The influence of British financial affairs which has been declining since the late year Abdul Hamid's reign, is being restored under the new regime. A national bank of Turkey is now in course of formation with the British capital, the prime mover being Sir Ernest Cassel, Lord Rothschild and Sir Alexander Henderson.

SUSPECT THE PORTE OF FORCING ISSUE.
[ASSOCIATED PRESS NIGHT REPORT.]
LONDON, Aug. 8.—The Times' Constantinople correspondent says the question arises whether the Porte is now courting a diplomatic check by communicating with Greece on a matter for which four powers have a responsibility. It also is asked whether the confusion of the Macedonian and Cretan issues by calling attention to the reserve Greek officers in Macedonia in a note to Greece is not calculated to arouse a suspicion that the Porte, acting doubtless under pressure, is desirous of forcing a war upon Greece.

MINER REACHES TEXAS WITH TERRIBLE STORY.
American Declares He Was Thrown Into Jail Without Food or Water by Mexican Rebels at San Carlos, Chihuahua, and Escaped After Overpowering Drunken Guard.

[BY DIRECT WIRE TO THE TIMES.]
EL PASO (Tex.) Aug. 8.—[Exclusive Dispatch.] First reports from the Mexican revolution at San Carlos, Chihuahua, to the effect that foreigners were not molested, were untrue, according to the story of John Nunn, an American mining engineer who reached the Chisos mine, in Texas, today.

A dispatch from Marathon states that Nunn has just arrived, emaciated and almost starved, with a terrible story of suffering at the hands of the Mexicans, who deposed the officials of the town and set up a small republic of their own until a compromise was effected with the State officials.

Nunn says he was placed in prison with two American companions when the rebels took the town, and that they were confined in a dungeon without food or water. They finally made their escape by overpowering a drunken guard, and made their way as best they could across the desert, in the direction of the Rio Grande. They had nothing to eat and only a small bottle of water each. This was soon exhausted and the men perished, Nunn was almost delirious and does not know if the other men perished, or found aid in some Mexican ranch-house.

LOS ANGELES DAY AT FAIR.
SHATTLE (Wash.) Aug. 8.—A delegation of 100 business men of Los Angeles representing the Chamber of Commerce of that city arrived here tonight on their special train, ready to participate in the celebration of Los Angeles Day at the Alaska-Yukon-Pacific Exposition tomorrow.

LAZY SUNDAY.
BEVERLY HOT, BUT TAFT DOESN'T MIND.
[Associated Press Night Report.]
BEVERLY (Mass.) Aug. 8.—Beverly was almost as hot as Washington today, but President Taft passed a lazy Sunday, and did not seem to mind the more than 90 deg. in the shade. He attended morning services at the Unitarian Church and devoted several hours in the afternoon to reading.

Mr. Taft has several matters of official business before him during the coming week. He will dispose of the matter of census supervisors throughout the entire United States. Secretary Nagel and Director of the Census Bureau are coming to Beverly with a long list of names, and by the time they leave the President hopes to announce his appointments.

The President is giving serious consideration to the strained situation between Japan and China over the Mukden-Antung railroad. The matter was brought to his attention by Secretary of State Knox before leaving Washington. In the event of a complaint of violation being lodged against either party to the treaty it is believed for consideration by all the powers. The United States will have a hand in whatever is done.

The President has definitely decided not to call the attention of the court, provided for in the new tariff bill. While it authorized the court, Congress failed to make an appropriation for the judges or any other officials. He has no desire to antagonize Congress and he believes that in both the Senate and the House, the members should have the right to express by a vote their preferences in the matter of salaries.

Mr. Taft has turned over to Secretary MacVane, the task of selecting five experts to form a tariff commission under the new law. These experts will assist the President in the administration of the maximum and minimum provisions.

President Taft said today that he did not expect to do any active work on his message to Congress until November. Several Cabinet members are working on details of the various provisions. Attorney General Wickersham has in hand the proposition of returning the laws as to interstate commerce and violations of the anti-trust law.

President Taft is looking forward to a period of great prosperity in the Philippines as a result of the enactment of the Philippine tariff law. The President believes the free entry of cigars and sugar will help the islands greatly. There is a healthy tobacco trade in the Philippines, formed by Spaniards and operated by French capital. The opening of the American market to Philippine cigars, the President believes, will make tobacco more valuable in the islands, and will enable the peasant planters to get a fair price for their products.

Down around the quay they lie, The ships that sail the sea, And they'll talk of one big city, Where they used to talk of three.

Is related that when Gamahoe Bill Stone of San Francisco was arrested for slapping the negro "he smoked one cigarette after another." It is a thrilling picture of an American states-

man in a position to place 3,000,000 dollars in the field. The little brown man has something up his sleeve. Against whom he intends to hurl himself—the United States or China?

THE CITY TAX RATE.

The effort of the Council Budget Committee and the City Auditor to keep the city tax rate down during the current year to figures that obtained last year—85 cents—is one that meets with general approval by those whose property makes up the \$275,000,000 of assessable valuation and who must pay the cash that any levy will require.

The people of Los Angeles, who furnish the income of the municipal government, have never practiced parsimony and do not expect it now. No city has had less difficulty with its taxation and no people have been more generous. In fact they are lavish. And with that generosity they have seen the departments of government expand in the past few years and many permanent additions provided, until it must strike most of us that the city is abundantly officered and that the officers are well paid. We do not mean that all of the elective officers, whose salaries are fixed by the charter, are well paid, but better for them is not a question the budget can now decide. The annual additions to the city's pay roll have made the salary item alone a tremendous one in the budget.

The gross income for the city last year was \$3,365,960. Of this amount \$2,167,949 went for salaries and \$787,754 for expenses of administration and maintenance. The pitiful remainder, \$410,847, went for betterments, called "outlays," by the Auditor's system of accounts, but which the taxpayer understands best by designating it "purchases which we still have"—lands and buildings and equipment. This certainly shows no parsimony except in the line of betterments. It may show that the city is paying \$2 in salaries where it ought to pay only \$1 and we believe that a new system of government might demonstrate this as a real truth. Places have been made, bureaus established, fads followed and necessities met until the multitude of employes has become a serious financial burden.

But the Budget Committee cannot do much with that situation except to deplore it. It must remain as it is, perhaps, until a new system is provided. The committee is face to face with what seems to be an apparent necessity for larger revenue. The department demands exceed the estimated income by \$1,250,000. The Auditor and the committee have based their income on a tax levy of 85 cents. On this basis the increase of \$10,000,000 in the assessed valuation will increase the income \$100,000. In other words, the city will have \$100,000 more this year than last, and yet this will not approach the needs of the departments, according to their estimates. The committee has reduced the estimates \$540,000. It has asked the police, fire and park departments (now under the control of the recall administration) to cut off the remainder; but the Mayor and his official family declined to undertake the job. Therefore the committee must do the work.

Much of the increase demanded is not transient, but will be annual for years to come. Some of it, like the increase in pay for the rank and file of the fire department, should be provided, if possible. But increases must not be made at the expense of a generous public simply because it can be done.

Last year about 14.75 of the \$1 rate was used as a school levy and produced \$400,000. This year this tax will be levied by the Supervisors. The school management will need probably \$500,000 instead of \$400,000 this year. But the fact that this levy is made by the Supervisors and not by the Council will not relieve the taxable city property in the least, and it will be a tax on the same just as if it were still included in the \$1 municipal rate. The Auditor and the committee see this situation and regard the school tax as one that they must consider, for it is a burden on the same property they would have to charge with an increase over the 85-cent rate.

And it is found that even if the Council did raise the tax rate to \$1, which it now may do, only about \$415,000 would be added to the city's income—an amount that would not go one-third of the way to meet the department demands. And it would make practically a tax rate of \$1.16 or \$1.17, including schools.

In addition, there is a levy of 25 cents for sinking fund and interest. This levy is to take care of the aqueduct debt until that project begins to take care of itself. For the next few years it is going to be a load and the Council must not, without the most serious reason, extend burdens along other lines. Add to this the other and the city taxables must pay \$1.41 or \$1.42.

We believe the city did very well in the year ending June 30 last by living within its income. This year we will have \$100,000 more by the natural increase of valuations. It looks as if this income would be sufficient and the Auditor and the committee will doubtless find a way to keep within it again. If they do the Council will not be justified in ordering an increase except for some vital reason that does not now appear.

AN EDUCATIONAL SHEET.

As already announced, The Times will issue as a part of its next Sunday edition a special sheet devoted to the schools. This will be the third of the special educational sheets printed by The Times during the present summer—and still further features taking up this important matter in a new way will soon be presented to the attention of our readers. No newspaper in the West has labored so earnestly in behalf of the educational cause, has devoted so much space to it, has fought its real enemies so valiantly or exposed its fakers so mercilessly as has The Times.

Next Sunday's sheet will take the form of a 24-page magazine section, printed in colors on fine paper, and will be the most attractive and elaborate and the best filled of all the school sheets put out by this journal from time to time—assisted in the success of the same by its blaring enemies. The sheet will deal with both the public and private schools of Los Angeles and Southern California, the universities and colleges, the opportunities for art education, for musical education, for business education and all the multifarious advantages for a liberal culture presented in this center of the arts and sciences.

This number of The Times will have a very large circulation and will spread far and wide information as to the preeminence of this Southland in educational opportunities. In the extent and variety of both its text and its advertising it will be an eye-opener; and the idea has met with signal favor from the start.

AEROPLANE OR DIRIGIBLE?

The contest between inventors for the successful navigation of the air has developed warm passions for each of the successful types. In Germany the dirigible balloon has the lead. In France it is a contest between the biplane and the monoplane. In this country it seems to be the biplane of the Wrights. As regards practical use the Zeppelin type appears, at present, to have the most merit, regarding which the New York Press says:

"Development of the new principle in navigating the air wherewith the Wrights and Bleriot are starting the world somehow fails to detract from the very substantial accomplishments to the credit of Count Zeppelin."

The German is not at the mercy of wind currents. He doesn't care whether it rains, hails, or freezes. Such and such time is fixed for the start, and such and such place is announced as his destination—and he gets there. The latest flight—from Friedrichshafen to the airship world's fair at Frankfurt—was made in the face of a heavy headwind, with hailstones pelting the crew, yet the 220 miles were traveled in a straight line, and the landing was made gracefully in a little space marked out for the finish of the journey.

The Zeppelin type of airship surely will be established in a regular transportation service, on a regular schedule, before many years. Before the aeroplane will attract patrons it must develop a

THE CARETAKER.

motor scheme less hazardous than it is now, when with the failure of its single engine the ship immediately hits the earth or the waters thereof. "For military purposes, too, the dirigible balloon is far ahead of the heavier-than-air machine."

As Americans we should naturally favor the aeroplane as the Wrights, though having many present competitors, developed this method of navigating the air. But whether the aeroplane or the dirigible balloon proves the popular airship of the future, will be a question of motors. The Zeppelin dirigible balloon without a successful motor would have no more value as a transportation agency than the aeroplane. In hardly any direction have the mechanics of the world made greater progress during the past few years than in the building of motors. The automobile gave an incentive to the industry because at the start the weight of the then storage batteries were too heavy to permit the successful development of the electric automobile. Each year increased simplicity has been claimed for these small but powerful motors. Similar progress must occur in the development of motors for airships, and it will be the more rapid as there is a demand for air navigation.

It will require a generation, at least, for more than a comparative handful of people to care about navigating the air. It may become as safe to fly above church spires as it is to drive a farm wagon on a country road, but it is against human nature to so regard it. As the speed of the automobile helped its adoption by business men, so may the speed of air navigation help popularize that method of traveling. The Bleriot machine exceeded the speed of torpedo-boat destroyers in its passage across the English Channel. The Wrights have excited the world by the speed they have attained in their land flights, and it is this fact that will hold the permanent attention of the world when the novelty passes off. It is a matter of motors therefore rather than the presence or absence of gas bags. The mechanist-inventors are to have their innings as the next factor of the problem, and till they have accomplished their perfect work neither type of airship will prove of more than temporary superiority.

NOT THE MODERN WAY.

Teams of veteran lacrosse players from this city and San Francisco gave interesting exhibitions yesterday and the day before. They showed remarkable cleverness and agility. The games were attractive and the display of skill commendable.

It is evident, however, that most of those who took part are what the youngsters of today condescendingly call old-timers. From the point of view of the rising generation the players who appeared at Fiesta Park don't know the first thing about lacrosse.

The excellent pictures which appeared in The Times "Pink" sheet yesterday show that the game lacked all the twentieth-century essentials. No doctors are visible, not an ambulance is to be seen, neither is there a nurse with a red cross on her pink and rounded arm. These indispensable attributes of up-to-date lacrosse are conspicuously absent. Moreover, none of the players are today lying on cots in local hospitals bandaged fore and aft, nor is the umpire nursing wounds. It is, indeed, only too evident that the Los Angeles and Olympic teams are woefully wanting in the real knowledge of the game.

A study of the largest photograph shows us the principal reason for this. There we see the men making many efforts to get the ball. How absurd. The modern slogan is: "Get the man, never mind the ball."

Modern lacrosse was born on the Pacific Coast of Canada. Up to the late nineties, the championship of the Dominion, and hence of the world, was held either in Montreal, Ottawa or Toronto. The players there looked upon the men in the Coast teams as nothing short of "dubs." The championship could never come this side of the Rockies, they insolently said.

Now up in British Columbia on the Fraser River, where the sockeye salmon run, there's a city called New Westminster. It has only about 8000 people, but every inhabitant knows how to handle a lacrosse stick and how to use it so that it will do the greatest amount of damage. The people of New Westminster got tired of hearing the easterners talk about their invincibility, so they raised a fund and sent their "Salmon Bellies," as they call their team, over the mountains and across the plains to the frozen East.

'Twas a sad tale of continuous slaughter that the Canadian newspapers had to relate, but the "Salmon Bellies" returned home with the championship cup. And they've got it yet.

The New Westminster men introduced the new

style of "checking." They were no respecters of persons, and there was a great and immediate demand in the surprised East for court plaster and lint. No longer do the British Columbia men have to go East. They being the champions the teams beyond the mountains which desire to lift the cup are obliged to journey West. Two of them appeared on the Pacific Coast this season, one from Regina, the other from Toronto. They returned home minus the cup but with several mementoes in the way of hard knocks, bruised noses, chipped ears and blackened skins.

Those New Westminster boys surely are rough, but they know the modern game of lacrosse from page one to "thirty."

EUROPE AND THE GREAT AMERICAN FACTORY.

Exports of American manufactures to Europe rose from a value of \$111,500,000 in 1898 to \$367,500,000 in 1928, a gain of \$256,000,000, or a little over 230 per cent. Other exports to Europe increased from \$509,000,000 to \$902,000,000, a betterment of \$393,000,000, or 77 per cent. These figures of exported manufactures include manufactures ready for consumption (or finished manufactures) and manufactures for further use in manufacturing. In finished manufactures the rise was from \$82,500,000 to \$173,000,000, a gain of nearly 200 per cent. The export growth in the group of manufactures for further use in manufacturing was even greater, the total value of articles in this group sent to all Europe in 1898 having been in round terms \$49,000,000, and in 1928 \$194,000,000, having thus practically quadrupled in the thirteen years, says the Bureau of Statistics.

For illustration, \$500,000,000 worth of American manufactures were sent to Germany in the decade ending with the fiscal year 1929, against \$460,000,000 worth in the decade ending with 1920 fiscal year, an increase of over 80 per cent. having occurred in the 1899 to 1928 inclusive decade.

The 1928 fiscal year exports of manufactures to Germany included principally:

Copper	\$19,750,000
Illuminating oil	7,546,803
Rosin	5,674,803
Lubricating oil	2,591,511
Furs and furskins	2,030,591
Metal-working machinery	1,935,468
Spirits of turpentine	1,874,547
Boards, deals and planks	1,749,547
Mowers and reapers	1,651,483
Sewing machines	1,170,598
Upper leather for shoes	1,164,567
Typewriters	1,023,440

Other manufactures sent to Germany in 1928 included cash registers, builders' hardware, tools, artificial teeth, varnish, electrical machinery, laundry machinery, boots and shoes (leather and rubber), corn, oil, bicycles, plows and cultivators, brass manufactures, automobiles, watches, cotton knit goods, twine, cutlery, firearms, steam engines, wood-working machinery, printing presses, pipe and fittings, stoves and ranges, pianos, organs, automatic piano players, nickel oxide, paraffin, staves, sawed timber, hewn timber, vulcanized fibers and a host of other manufactured articles of lesser importance.

As Germany is a country full of factories of all kinds the fact that it buys so largely of our manufactured products in so long and varied a list, indicates how dependent Europe is becoming on the American factory.

UNCLE WALT. WARBLED.

Where Grows the Sunflower.

The king sat up on his jeweled throne, and he heaved a sigh that was like a groan, for his crown was hard, and it bruised his head, and his scepter weighed like a pig of lead; the ladies smirked as they came to beg; the knights were pulling the royal leg. The king exclaimed: "If I had my wish, I would cut this out, and I'd go and fish. For what is pomp to a weary soul that yearns and yearns for the fishing hole; the throne's a bore and the crown a gawd, and I'd swap the lot for a bamboo rod, and a can of worms and a piece of string—but there's no such luck for a poor old king!" And a boy who passed by the palace high, to fish for trout in the streamlet near, looked up in awe at the massive walls, and caught a glimpse of the marble halls, and he said to himself: "Oh, hully gee! Wish I was the king, and the king was me! To reign all day with your crown on straight in a whole lot better'n diggin' bait, and fishin' round when the fish won't bite, and gettin' licked for your luck at night!"

In Virginia a woman shot her husband because he wouldn't stop playing the phonograph. No jury will convict her.

HOROSCOPE.

Monday, August 9, 1930.

Blings off the old coat, and puts on a new one.

On this day Mars, in beneficent moon, rules powerfully for the affairs of courage and ambition, lending them buoyant energy. All persons, and particularly, should push the influence to the utmost, doing their tasks with buoyant minds and hands.

The period is fortunate for planning important undertakings and interesting projects. It is indicated, too, as a change old conditions and install new enthusiasm in the prosecution of duties fallen into ruts.

Employers are warned by the astrologer to avoid office quarrels or intrigues and to keep their tongues. Men in business are in danger of entering contests with their sufficiently considering the cost of the war. Speculation of any kind is under a ban. There is danger also in business or social with those who are known to be vindictive.

Persons with ailments are under a ban for Mars in today's position assures well and hand of surgeons and physicians. Persons wearing uniforms, livery or of rank or calling are under a ban. et favors engineers, butchers, hatters, tailors, blacksmiths, wood-workers, carpenters and masons.

It will be well to guard sedulously against the afternoon and evening. This day is considered by the astrologer when onions, leeks, tobacco, wormwood, radish, habberdy, cress, coriander, and mustard will be extremely potent power of Mars.

Persons with this birthday should guard against insisting too much on the doing things during the twelvemonth employment will profit. Those with this day must avoid speculation.

Children born today are under a ban of extreme vigor and quickness of intellect, however, by a tendency to vanity and self-tim.

VARIOUS VIEWS REVIEWED.

A Service Reorganized.

We have called attention to the most of the independent newspapers and tendencies to recognize the significance of Taft's victory over the tariff reform Congress. Our former neighbor, the Times, seems to be almost alone among the class described in trying to do the great public service and in doing with becoming "responsible for a new break and betrays his campaign against New York World and the Philadelphia Record, not ready to go so far as to say that Taft has put himself in a position of a President who has the courage to make good his promise. A gist that the new law will not make lower prices by permitting foreign goods such a volume as to drive American goods from the home market. The measure was never intended to have such an effect, signed to be corrective, not destructive, adequate protection to American industry, but, in the same time, to give the tariff duties and to point the way to a national application of the protection principle. [New York Tribune.]

A Novel Offer.

A novel offer has been made by the State of Texas by the brewers of the proposition of a commission of twelve, equal in number by the brewers and one-half by the State, to visit and investigate the liquor traffic in the State. The proposition is a discovery report that more than a "dry" than in the "wet" States. The State will give \$100,000 to any charity that will by the prohibition State Commission. The subsequent developments would be of interest. It is hardly likely that it will be maintained. [Schenectady Union.]

Future Captains of Industry.

Our future captains of industry will be found in the ranks of the young men. They are rodding on the patchers en route for railway engineering courses fitting themselves to be financial leaders. The young men are partly the gift of nature and partly in the hard school of experience.

Experiments in Politics.

Bryan-Brian. It is said that Bryan-Brian, who was most of the political positions. They are rodding on the patchers en route for railway engineering courses fitting themselves to be financial leaders. The young men are partly the gift of nature and partly in the hard school of experience.

Yes, Watch Him.

Whenever you see one of these "Bryan-Brian" men, watch him. From our knowledge of the general character of his political attitude, we should not be surprised to find him in the ranks of the patchers en route for railway engineering courses fitting themselves to be financial leaders. The young men are partly the gift of nature and partly in the hard school of experience.

Go to the Head.

In one of Boston's primary schools the head master of the district has been for the scholars that would require the knowledge of the general character of his political attitude, we should not be surprised to find him in the ranks of the patchers en route for railway engineering courses fitting themselves to be financial leaders. The young men are partly the gift of nature and partly in the hard school of experience.

MANY HIGH-CLASS MEN TO MEET IN ATHLETIC GAMES.

(ASSOCIATED PRESS NIGHT REPORT.)

SEATTLE (Wash.) Aug. 8.—The national championship games of the Amateur Athletic Union will be held in the stadium of the Alaska-Tukuma-Pacifi Exposition next Friday and Saturday and a large number of the best men in the country are on the program. With the perfect conditions of track and climate, it is expected that world's records will be broken.

Among the celebrities entered are Porting of the Missouri Athletic Club, St. Louis, who holds the world's indoor record, 51.5 seconds for the fifty-yard dash; Hillman of the New York Athletic Club, who holds the 1908 championship for the quarter-mile run, and Glens of the New York Athletic Club, who won the junior championship of 1908 for the half-mile race. Bellars of the New York Athletic Club, the present champion, is entered, as is also Osa

C. Smith of Little Rock, Ark., who holds the indoor record for the 120-yard hurdles. Smithson of Portland, the world's record hurdler at 120 meters, will contest with Shaw of Chicago, holder of the world's record for 120 yards. Smithson also will compete with Hillman in the 220-yard hurdles.

Leahy of New York, who holds the world's record for the broad jump, will meet a distinguished group of runners. President James E. Sullivan of the Amateur Athletic Union will referee the contests.

Took His Wind. "Yes," said young Windig, boastfully. "I pass most of my time between Chicago and New York."

"That's what your cousin told me," rejoined Miss Cayenne.

"My Cousin?" replied Windig.

"What did she say?"

"She said," replied Miss Cayenne, "that you lived in a little town in Ohio."

Reproduction of Immense Photograph.

The original of which will be presented to President Taft by Clarence F. Samuelson, deputy chief of the Manila, P. I. Fire Department. The picture shows Fire Commissioner Percy G. McDonnell, in plain clothes, with Chief Dignan at his left and the deputy chief with the captains of companies standing up.

FIIGHTS AT GAMES.

DISRUPTION OF LEAGUE TO FOLLOW ROWDYISM.

(BY DIRECT WIRE TO THE TIMES.)

SACRAMENTO, Aug. 8.—[Exclusive Dispatch.] Disruption of the California State Baseball League, the only one of consequence in the country which defies the national organization, seems to be certain tonight as a result of the rowdyism at an attack upon Empire Henley by spectators in denouncing their money back. The Stockton manager has been fined \$100 for taking his men from the field.

Today immense crowds attended both morning and afternoon games. At the former there was a riot precipitated by an attack upon Empire Henley by spectators in denouncing their money back. The Stockton manager has been fined \$100 for taking his men from the field.

THIS CITY FAR IN LEAD.

Gross Receipts of Los Angeles, Seattle and Portland Postoffices Compared.

Postmaster Flint has compiled a statement of the gross receipts of the local Postoffice, as compared with those of the offices at Seattle and Portland. The recent large business at Seattle is accounted for by the number of visitors in attendance upon the exposition.

The following table tells the story:

Los Angeles, Seattle, Portland.
2nd quarter, 1909... \$1,215,127.71 \$1,044,846 \$1,044,846
1st quarter, 1909... \$1,044,846 \$1,044,846 \$1,044,846
3rd quarter, 1909... \$1,044,846 \$1,044,846 \$1,044,846
4th quarter, 1909... \$1,044,846 \$1,044,846 \$1,044,846
Total for year... \$4,359,568.81 \$4,359,568.81 \$4,359,568.81

Many Auto Factories.

Detroit possesses fourteen factories devoted exclusively to the manufacture of automobiles, employing more than 14,000 men, with an annual pay roll of \$2,533,000. The value of the output this season will be \$4,353,000, of which \$2,500,000 is represented in exports.

Two auto buses have been put in service in the Cleveland park system between Euclid avenue and Gordon Park, along the East boulevard, Cleveland, O.

ISLANDS' PROBLEMS.

PHILIPPINE FIRE FIGHTER HERE.

MANILA'S DEPUTY CHIEF TELLS OF CONDITIONS THERE.

Says Motor-Driven Apparatus is Needed, as Heat Kills So Many Horses. Visits Large Cities of United States—Los Angeles Department Highly Pleased.

"You people of Los Angeles should be proud of your fire department," said Clarence F. Samuelson, deputy fire chief of Manila, yesterday afternoon.

"I never saw a better drilled, better set up body of men," he continued, after inspection of Engine Company No. 20. It had, without warning, been put through a severe test for the visitor's benefit, and he was enthusiastic.

Samuelson is on his way to the annual convention of the International Association of Fire Engineers, which is to meet in Grand Rapids, Mich., within a few days. As soon as he has finished his stay there he will proceed to Washington, where he will see the President. He has a gigantic photograph of the Manila department, including Fire Commissioner P. O. McDonnell, Fire Chief Louis H. Dignan, and himself. This photo was made especially for the President, and only two copies of it are in existence. The other will be presented to the Fire Engineers Association at the convention.

The work of the Manila department, said Samuelson, is improving steadily and the recently finished \$4,800,000 water works and sewer enable it to do far better work in fighting fires among the tinder-like nipa-thatched shacks which make up half of the houses of the Philippine capital.

The conditions of that city are such that the firemen feel satisfied if they manage to hold a fire within a certain district, for once the flames get among the low-lying ever of dried palm leaves and bamboo it is hopeless to attempt to fight it there, and the heat that can be done is to halt its progress.

While in the United States, Samuelson will visit many of the larger cities for information that may prove useful in Manila. In Boston and New York he will inspect the motor fire-fighting apparatus in use in those cities.

"The heat in Manila and the more usual means of reaching a fire in the shortest possible time, are factors which argue for the use of motor-driven apparatus. The heat is often too much for the horses and the mortality among them is enormous."

Santa Fe

La Crescenta Wines

The most exquisite product of the California grape. The ideal in clarity, bouquet and perfection of flavor, derived by leading vintners from the finest grapes of the State.

Jevne's La Crescenta Olive Oil Is The Best and Purest You Can Buy

It is the first pressing of select California ripe olives, pure—wholesome—rich and absolutely free from all adulterants.

For summer salads—and all other purposes for which olive oil is used—it is positively unsurpassed. It has been constantly used in thousands of discriminating California homes for years. It is bottled exclusively by us—and guaranteed by us. Procurable at either Jevne store—and at more than a hundred first-class groceries.

Small bottles 30c, medium 50c, large 90c.

VISIT OUR FOURTH FLOOR CAFE—OPEN FROM 11:30 TO 5:30

Nothing more than the simple announcement to our regular customers is needed to attract buyers to these annual sales of black silks. To those who have not hitherto shared the savings—this word of explanation: Every yard of silk sold during this special sale is just as emphatically backed by our reputation for carrying only high-grade silks as if it brought full price. There are just as many threads of silk, just as good dyes, just as perfect weaves, as though you paid the first-named price.

Black Silks

Imported Pongees

34-in. Lyons dye, \$4.00 quality	\$3.00

McCall Fashion Sheets, Magazine and Patterns for September Are Here.
Subscriptions to McCall Magazine Taken at the Counter for 35c.

Bargains in Women's Apparel

If we searched through our entire stocks, we couldn't find better values to offer you than the two which follow. For not only are styles good, and prices alluringly low, but values are real as real can be; an assertion we shall be glad to have you let us prove:

\$7.50 to \$10.00 Wash Dresses \$5.00

Dainty colored lingerie styles—pink, cerise, light blue and lavender; some with lace belts, others with Princess effect—long panel fronts in the newest styles; fine, good qualities of trimmings, nothing cheap, except the price; together with dainty gingham, Indianhead and like firmer goods, made up with pretty Dutch necks, some opening down the side of the front; all fresh and perfect.

\$5.00

\$18.50 to \$32.50 Silk Dresses \$17.50

You may have practically any color you like in these garments, except white; there are a large number of charming summer styles, in pongee, taffeta, messaline and foulard silks; sizes 34 to 42 or 44;

\$17.50

A general clearance is now in force upon odds and ends of soiled blankets, styles of which we have but one or two pairs, etc., also comforts and pillows. Included in this sale we offer a beautiful white wool blanket, 3-inch silk ribbon bound, extra large size; regular \$7.00 quality for

\$5.00

LOS ANGELES' HOME OF THE OSTERMOOR MATTRESS

Special Wash Goods Values

Even if these weren't the very choicest of wash goods, their prices would lead you to buy liberally; as a matter of fact, there are no more reasonable stuffs offered at full regular worth than just these:

10c BATISTES FOR 7 1/2c
White and colored grounds; in every style of dot, stripe or figure; 7 1/2c
Usual 15c quality on sale 10c

20c BATISTES FOR 12 1/2c
White and colored backgrounds in dots, stripes and figures; large and small rose patterns; fine for party frocks; our best 20c grade placed on special sale for 12 1/2c

50c AND 75c SILK MIXED SUITINGS 25c
Not full lines, of course, but choice half-silk mixtures, in fancy effects of white grounds 25c

25c AND 35c IRISH DIMITIES 17 1/2c
Choice of our entire stock of white and colored grounds; regularly 25c and 35c, for 17 1/2c

50c MERCERIZED LINEN SUITING 35c
Linen Rajah suitings; plain colors of all shades; mercerized finish; 35c grade, 25c; 50c grade for 35c

Summer Floor and Window Coverings

These are the helpful things that go to make the house feel and appear cool during the warmer months.

Plain and fancy Japanese matting; 75 different patterns, from 20c to 60c a yard. Full lines of Crax rugs; fiber—both Japanese and Chinese reversible matting rugs; wool fiber, mixed Japanese cottons; in rich Oriental effects; also the latest weaves in Colonial rag rugs; 50c to \$18.50. Fifty styles of hassocks on display, 15c to \$1.25.

Cross striped madras curtains, in pinks, blues, green, olive, brown, rose and the latest weaves, \$1 to \$5 a pair.

Forty-inch stenciled scrim, both single and duplex print; latest Arts and Crafts designs; 25c and 30c a yard.

Visit our Suggestion Gallery; drapery and kimono silks now on special display.

Towels and Table Linens

Here are prices on table linens, huck towels and bedspreads that will induce buying by many thrifty housewives, who know how staple such articles are:

35c TOWELS 25c.
Extra large, double thread bath towels; full bleach.

25c TOWELS 20c.
Huck towels; very heavy and absorbent; all white, hemstitched ends.

75c TOWELS 50c.
Huck towels, grass bleached; all linen; splendid value.

\$1.25 TABLE LINEN \$1.00 YARD.
One of John S. Brown's famous Shamrock brand; best made.

\$3.25 NAPKINS \$2.25.
22x22-inch size; fine quality.

BED SPREADS REDUCED.
Some two hundred odd spreads, in satin, Messaline and crocheted finish, fringed or hemmed, will be closed out at decisive reductions, for quick clearance.

Sample Undermuslins

We were very fortunate in securing a large quantity of sample undermuslins of the highest quality—otherwise we couldn't have sustained the interest that has attended this sale from the beginning. Today assortments are practically as complete as when we first announced the arrival of these charming articles of feminine wear:

Not a cheap or tawdry piece can be found in the whole collection, at any price; for we would not insult your intelligence, or confidence, in this store, by any such offering; fine firm materials, neatly trimmed with Cluny, Valenciennes and like good lace; or some of them, embroidery trimmed in pretty fashion.

Choose from either the separate drawers, corset covers, shirts, chemises and gowns, or from the novel and vastly comfortable combination garments, which so many women are now wearing. Second floor.

COULTER DRY GOODS CO.

FOR SALE
Miscellaneous.

TO "LINK" ADVERTISERS:
Starting from June 1, classified advertising in this paper will be charged for the words in the present established rate of 10¢ per word in the first line and 7¢ per word in subsequent lines.
Close calculations, covering a period of one year, have shown that the average number of words in the line are a fraction over seven. This means for charge, 80¢ per line.
Cash "want" advertising has always been charged at 10¢ per word. This rate is being reduced to 7¢ per word. This new rate will not change the manner of handling it. It will, however, result in a saving of 30% for the advertiser for many years. Through the circulation of the paper, now more than 100,000, the advertiser can reach a large number of people.
No paper in the United States, male community, has a larger circulation. The Times is read and service.

Second Contest Goes Through Fourteen Innings.

lucky this year. They groaned more when Thoren made a wild pitch that allowed Shinn to score. They trembled as they shook the grand stand when he made a second wild pitch and when they saw that they actually witnessed when he followed with a third wild pitch that sent in Gandil.

This was undoubtedly a world's record, and yet those that recovered from those three successive blows, noticed dimly that at the next three batsmen were out.

The fans were entirely unprepared for what followed, for the records of

Two out was winning run scored.
